

# Introducing AlloCare

The new kidney  
transplant patient app

## What patients get:

Easy and convenient way to track important health metrics like fluids, urine, weight, blood pressure, temperature, blood sugar, pulse ox, steps, sleep, and mood

Medication management with reminders, pictures and instructions to improve adherence

Data trending to help patients monitor their own compliance and identify potential health concerns

Ability to schedule AlloSure labs and receive lab reminders

Electronic education materials that are easy to access on the go

## What centers get:

Your center's educational materials available electronically to your patients and updated automatically when needed

Data dashboards shared by your patients help you identify trends in their compliance and health metrics

The ability to add your center's upcoming events, news, and customizable messages
